Practical Skills Examination
Bronchodilator Therapy**

10 minute	INITIAL	
Time Limit	RETEST	

Name: _____ Date: _____
 Examiner: _____ Start Time: _____
 TDH# _____ Stop Time: _____

1	Begins oxygen flow at prescribed rate	
2	Places delivery device on the patient	
3	Auscultates patients lungs to determine adequacy of ventilations	
4	Confirms order for metered dose inhaler	
5	Informs the patient of the order and inquires as to allergies and other medication use	
6	Selects and checks the appropriate medication and shakes container	
7	Instructs patient on MDI use	
8	Re-checks medication	
9	Removes oxygen delivery device, inserts MDI in patients mouth, delivers medication	
10	Removes MDI and replaces oxygen delivery device on patient	
11	Auscultates patients lungs to determine adequacy of ventilations	
12	Confirms order for a bronchodilator via the small volume nebulizer.	
13	Informs the patient of the order and reconfirms allergies and medication use	
14	Selects and checks the appropriate medication	
15	Assembles the nebulizer and fills the chamber with bronchodilator	
16	Re-checks medication	
17	Begins oxygen flow to nebulizer at prescribed rate	
18	Removes oxygen device and places nebulizer in mouth or on patient	
19	Removes nebulizer and replaces oxygen device	
20	Auscultates patients lungs to determine adequacy of ventilations	

Critical Criteria

- Exceeds time limit _____
- Fails to auscultate patients lungs after any therapy _____
- Fails to deliver oxygen at high flow during treatment _____
- Fails to inquire about allergies / medication prior to administration of first medication _____
- Fails to recheck each medication at least once before delivery _____
- Administers incorrect medication or incorrect dose _____
- Does not confirm order or inform patient of the order _____
- Contaminates equipment or supplies _____
- Commits any potentially detrimental errors _____
